DETAILED ACTION

Oath/Declaration

The objection to the declaration is withdrawn, please refer to 1327 OG 112, 12
 February 2008 for further guidance.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless -

- (b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.
- Claims 1 and 3 are rejected under 35 U.S.C. 102(b) as being anticipated by Taniguchi et al, 6,568,083, as set forth in the previous Office action.

Claim Rejections - 35 USC § 103

- 4. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:
 - (a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negatived by the manner in which the invention was made.
- Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Taniguchi
 et al, 6,568,083 in view of Meyer et al, 3,855,697, as set forth in the previous Office
 action.

Response to Arguments

 Applicant's arguments filed 07 January 2008 have been fully considered but they are not persuasive. Applicant argues that '083 does not disclose the claimed invention. Application/Control Number: 10/569,175

Art Unit: 3723

Applicant specifically argues that '083 does not that both the short hair cutting device and the long hair cutting device, with the carrying device located in its second operating position, project farther out of the housing than when the carrying device is located in its first operating position. The examiner disagrees. For example, the first embodiment, disclosed in column 6, lines 21 through column 10, lines 55, discloses a shaver having a housing, see for example figure 4B, the housing containing the motor and drive means, (the same structure broadly disclosed by applicant, see '083, column 9, lines 34 through column 10, lines 22), the short hair cutter and long hair cutter positioned on a carrier, which has several positions, the short and long hair cutters project further outside the housing when the carrying device is located in a second position than when it is in a first position, see for example column 7, lines 5-24, "The head frame 70 thus supporting the outer cutters 62 is mounted on tip of the housing and is connected to a height adjust mechanism so as to be vertically moveable relative to the housing between a high position of FIG. 1 and a low position." Further column 7, lines 13-19, "The cutter holders 63 each carrying the outer cutter 62 are provided for short hair shaving, while a long hair shaving cutter unit 66 is also supported to the head frame 70...". This clearly anticipates applicant's invention as set forth in claims 1 and 3. If applicant has other structure than that claimed that would overcome the rejection, it should be claimed. In response to applicant's argument that the references fail to show certain features of applicant's invention, it is noted that the features upon which applicant relies (i.e., any attachment structure between the carrier and the cutting devices) are not recited in the rejected claim(s). Although the claims are interpreted in light of the specification,

Page 4

Application/Control Number: 10/569,175

Art Unit: 3723

limitations from the specification are not read into the claims. See *In re Van Geuns*, 988 F.2d 1181, 26 USPQ2d 1057 (Fed. Cir. 1993).

7. Applicant has further complained that the examiner did not fully articulate the basis of the rejection. The examiner strongly disagrees. The examiner clearly pointed out what structure corresponded to each of the claimed limitations by figure reference number, as well as pointing out where in the disclosure the descriptions of the referenced structure could be found. That applicant had to read several columns of the specification is moot, as applicant would have had to have read these sections in order to understand not just the rejection, but the invention of '083.

Conclusion

 THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
